

TURNER FAMILY

YOUR MISSIONARIES TO VANCOUVER

January 2024

Good Afternoon,

I am truly grateful for the faithful prayers of God's people! My twenty radiation treatments on the brain tumor concluded in early December. I was told a PET scan would be done approximately three months after radiation. This scan would let us know how effective the radiation treatments were. Please pray that the tumor is completely gone.

My neurologist has diagnosed me with CIDP. This is an autoimmune disorder in which the body's immune system attacks the myelin that insulates and protects the nerves. I received four treatments in December. Unfortunately, there have been no improvements as of yet. There are two more treatments scheduled for this month and February. CIDP has really impacted my ability to walk. I'm using a walker every day and even a scooter at times. Please pray for God's healing touch according to His will.

We continue to see God's good hand in all of this. Please pray that Becky and I will bring Him much glory. He alone is worthy!

Your friend,

Ben Turner
